Thorite Conflict Mineral Sourcing Policy

Thomas Wright/Thorite Group Ltd (Thorite) has continually striven to champion human rights and environmental issues, and is committed to acting responsibly in all aspects of our business.

Thorite condemns the crisis in the DRC and neighbouring countries and is committed to eliminating any raw materials, subassemblies or supplies which we know contain conflict minerals (tin, tantalum, tungsten, and gold - "3TG").

Thorite is a major supplier and installer of compressed air products primarily for, but not exclusively, the manufacturing industry. We perform no manufacturing and do not buy any conflict minerals directly from the DRC but with long and complex international supply chains, we cannot be certain that all our extended supply chains are conflict free.

We ask all of our suppliers to identify any products containing 3TG and if so to take immediate action to identify the origins of 3TG in those products along with a commitment to becoming conflict free. Thorite will evaluate our sourcing decisions based on our suppliers' willingness to cooperate in this programme.
