

Thorite Position Statement on REACH

Update – January 2021

Thorite recognises the European regulation (EC) No. 1907/2006 concerning Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), which entered into force June 2007.

As part of Thorite's commitment to legal compliance, we have analysed our requirements and identified ourselves as 'downstream users'. We do not knowingly directly manufacture, import or supply substances or preparations and our products do not knowingly contain (>0.1% by weight), or intentionally release, any Substances of Very High Concern as listed on the "Candidate List" (Annex XIV REACH) – 211 as of Jan 2021. This will be reviewed as the List is updated.

However, customers will need to review the use of our components, within their product application, with regard to this regulation.

We are maintaining communication with our supply chain regarding how they are meeting their REACH obligations, and particularly if they foresee any problems in future activities due to REACH requirements. At this time we are not aware of any issues that will affect our supply chain.

If you have any further questions please contact us on the following e mail address:
